PROFILE

I'm a Data Analyst with a strong background in Applied Statistics, data quality, SQL and Power BI. Hands-on experience with PostgreSQL, data profiling, data cleaning, validation, ETL, dimensional modeling, Power BI, DAX, and Excel. I'm currently completing my MSc in Applied Statistics, with a focus on statistical reasoning and data-driven problem solving. I'm passionate about transforming data to optimize business investments and minimize financial risk.

Skills

Data Management & Quality:

- ❖ Data Profiling, Data Cleaning, Data Validation, ETL & Data Preparation

Data Analysis & Statistics:

- ❖ SQL Analysis, Statistical Analysis, Trend & Pattern Identification, Descriptive Analysis, Analytical Problem Solving, Business-Question Analysis

Data Modeling & Databases:

- ❖ PostgreSQL, Relational Data Modeling, Star Schema, Fact & Dimension Design, SQL CTEs, Window Functions, Views

Reporting & Visualization:

- ❖ Power BI, DAX, Interactive Dashboards, KPI Reporting, Excel, Power Query, Data Storytelling

Technical Tools:

- ❖ PostgreSQL, SQL, Power BI, Excel, Git & GitHub
-

PROFESSIONAL EXPERIENCE

Sales Support / Operations Assistant

Topline Promos | Hangzhou, China | March 2024 – Present

- ❖ Manage and maintain product information across dozens of active listings, supporting accurate and consistent operational records.
 - ❖ Review product names, pricing, descriptions, and related information to identify inconsistencies and maintain data accuracy.
 - ❖ Support daily operations by maintaining dependable product and order information used for customer service and business activities.
 - ❖ Handle customer and order-related inquiries, resolving information gaps efficiently and communicating clearly with non-technical stakeholders.
-

KEY DATA ANALYTICS PROJECT

Sales & Profitability Analysis - PostgreSQL | SQL | Power BI | DAX

End-to-end analytical project transforming a supply-chain transactions dataset into a decision-ready reporting solution.

- ❖ Profiled source data and identified data-quality issues before visualization, including inconsistent values, invalid records, missing information, and formatting problems.
 - ❖ Built a Bronze - Silver - Gold SQL workflow in PostgreSQL to clean, standardize, transform, and prepare data for analysis.
 - ❖ Designed a star-schema analytical model using fact and dimension tables to establish consistent data grain and reliable business calculations.
 - ❖ Created SQL views and analytical datasets for profitability, product and category performance, discount analysis, and management reporting.
 - ❖ Developed Power BI measures and interactive report pages using DAX to analyze sales, profit, margin, discounts, products, and categories.
 - ❖ Performed data validation and reconciliation checks to improve confidence in reported figures before presenting analytical findings.
 - ❖ Designed the reporting solution around defined business questions, ensuring that the analysis produced trustworthy numbers rather than simply presenting visualizations.
-

EDUCATION

- ❖ MSc in Applied Statistics (Expected Jan 2027) | Zhejiang University of Science and Technology
- ❖ BSc in Communications Engineering 2023 | Zhejiang University of Science and Technology
